

Description of variables used for the replication of the study by Loyalka et al. (2019)

VARIABLE	DESCRIPTION
z_endline	Dependent variable: student's achievement
z_baseline	Baseline value of the dependent variable
age2	Student age
female	Student gender
father_jhs	Father education level
mother_jhs	Mother education level
class_size	Class size
t_age2	Teacher age
t_exp	Teacher experience
t_cert	Teacher certification dummy
t_rank_yigao	Teacher ranking
ses1	Household asset index
t_training_hours_terc	3 quantiles of t training hours
t_female	Teacher gender
t_4yrcoll	Teacher education level
t_major_math	Teacher major in math dummy
b_self_concept	Student's baseline math self-concept
b_anxiety	Student's baseline math anxiety
b_intr_motiv	Student's baseline intrinsic motivation for math
b_instrument_motiv	Student's baseline instrumental motivation for math
b_time_math	Baseline time spent each week studying math by a student
t_practice_base	Baseline instructional practices of teacher evaluated by student
t_care_base	Baseline teacher care evaluated by student
t_mgmt_base	Baseline classroom management of teacher evaluated by student
t_comm_base	Baseline teacher communication evaluated by student
treatment	=0 if no treatment; =1 if professional development (PD) program + follow-up; =2 if PD without follow-up
in_person	=0 if no evaluation; =1 if evaluation (PD only or PD + follow-up)
